PROFILE

With over seven years of experience as a senior software engineer, I have worked across a variety of companies and industries, contributing to diverse projects and technical teams. Through these roles, I have developed a broad and deep skill set while gaining extensive hands-on experience in designing, building, and maintaining scalable software solutions.

PROFESSIONAL EXPERIENCE

Senior Full-stack Developer, Hinge Health Built a centralized React and Node.js web portal that unified disparate network data and delivered a fully automated end-to-end network device upgrade system, from execution and data processing to real-time access through a performant dashboard and management interface.	05/2022 – 03/2025 New York, United States
Senior Software Developer, SLB Worked as a full-stack developer building REST APIs in Java and Node.js to support real-time monitoring and alerting, delivering a unified service that provides clear visibility into the health of applications running in both cloud and desktop environments.	09/2018 – 11/2021 Texas, United States

EDUCATION

University of West Alabama Master of Computer Science (MSCS)	2010 – 2014 Texas, United States
------------------------------------------------------------------------	-------------------------------------

SKILLS

• Full-Stack Development	• Node.js
• React Native	• REST API Development
• C++	• Machine Learning
• Computer Vision	• Python
• React	• Mobile App Development
• Flutter	• GraphQL
• AI Developemnt/AI Integration	• Django/FastAPI
• Object Tracking
