PROFILE

Hi, I build web and mobile applications powered by modern AI systems.
I specialize in integrating LLMs, RAG pipelines, and AI agents into real products - not demos, not prototypes, but production-ready systems designed for reliability, performance, and scale.
My work combines full stack engineering with applied AI, helping businesses turn data and workflows into intelligent, automated tools.

PROFESSIONAL EXPERIENCE

Generative AI Engineer, Pixite Inc Provided technical guidance and deployed generative AI models, designed scalable AWS architectures for multiple GenAI use cases, and delivered production-ready AI solutions including a retail shopping assistant and automated content generation systems.	08/2024 – 11/2025 San Diego, California
Senior Full Stack Engineer, Solarwinds Served as Lead Full Stack Developer building scalable web and mobile applications with modern frontend frameworks and Node.js backends, later promoted to Team Lead to mentor a 10-developer team, oversee sprints and code quality, and ensure architectural consistency, performance, and best practices across the codebase.	04/2023 – 06/2024 Austin, Texas

EDUCATION

University of Toronto Bachelor of Computer Science (BCompSc)	2019 – 2023 Ontario, Canada
--	--------------------------------

SKILLS

• AI Developemnt/AI Integration	• Python	• OpenAI/LLM Integration
• Machine Learning	• RAG Pipelines	• LangChain
• Mobile App Development	• React Native	• Flutter
• Full-Stack Development	• Node.js	• REST API Development
• C++	• Computer Vision	• React
• GraphQL	• Django/FastAPI	• Object Tracking
• N8N	• Make	• Zapier

LANGUAGES

- English
